

## Freeman ProPly Composite Diebase

### Description

Freeman's ProPly™ was developed to offer diemakers a stronger flat dieboard at a lighter weight than solid ProForm™. ProPly is constructed of a strong and stable maple core, laminated with 1/16" thick ProForm faces. ProPly is laser-friendly, and now provides diemakers and converters with a dead flat, very strong dieboard without the weight.

### Physical Properties

Color	Gray
Hardness (ASTM D785)(Rockwell M Scale)	N/A
Specific Gravity (ASTM D792)	N/A
